[C2G 0.3m Cat5e Booted Unshielded \(UTP\) Network Patch Cable - Black:](#)

For fast Ethernet networks that require bandwidth-intensive voice, data, or video distribution applications. Meets all Cat5e TIA/EIA standards, and drastically reduces both impedance and structural return loss (SRL). Each of the individual pairs are bonded together to help maintain the twist-spacing throughout the line right up to the termination point. Constructed from high quality copper cable, this design minimises Near-End Crosstalk (NEXT) levels. The moulded, snagless boot prevents unwanted cable snags during installation and provides extra strain relief. Available in a variety of colours to easily colour-code your network installation. Each cable is individually labelled with the length for ease of use. C2G 0.3m Cat5e Booted Unshielded (UTP) Network Patch Cable - Black.
