## Fast charging for three devices

It was a long, draining flight – but you’ve made it. You check into the hotel, drop your bags in the room and turn to go enjoy the nightlife or make it to the big meeting.

Only to discover your phone and buds are on their last legs after that long flight and you’ve forgotten to charge your camera’s battery. Thankfully, you brought your 3X67 Rapid Power GaN Charger.

Its next-generation Gallium Nitride (GaN) semiconductor allows it to deliver a total of 67W rapid charging for three devices simultaneously, while weighing just 110g.

You won’t miss a thing.

## The latest GaN technology

The ALOGIC Rapid Power USB-C Charger incorporates GaN “Gallium Nitride”, a next-generation semiconductor that replaces silicon & enables very high energy & power in a very small compact & portable size. The 67W GaN charger lets you charge any 2 USB-C & USB-A equipped devices such as laptop, tablets & phones etc simultaneously at the highest possible speed.

## Travel made easy

We’ve all done it: flopped down on the hotel bed after an exhausting flight and gone to plug in the laptop only to discover we’ve brought the wrong plug. Or forgotten it all together in the last-minute packing.

With interchangeable plugs for four of the world’s most popular travel destinations tucked neatly away into their carry case, that’s one less thing to worry about. We’ve taken care of it.

Speaking of the carry case, we’ve spared no expense. Its fabric exterior looks and feels great, while its moulded foam interior ensures all your cables, plugs and chargers are safe and snug throughout your travels.

## Works with almost everything

USB PD (Power Delivery) technology ensures it delivers the quickest charging that’s safe for your devices, no matter what you have connected and with 67W, the Rapid Power Charger is more than capable of powering your MacBook Air during use and while super-fast charging your Samsung phone.

All this in a device just over 5cm long. Light, compact, powerful and versatile; the perfect travel companion.

### User Interface

<b>Input</b>	AC 100-240V ~50/60Hz, 1.5A max.
<b>Output</b>	2x USB-C (female) charging port 1x USB-A (female) charging port
<b>USB-C Output 1:</b>	5/9/12/15V = 3.0A, 20V = 3.35A, 5-21V = 3.0A
<b>USB-C Output 2 + USB-A Output:</b>	5V = 3.0A Max
<b>Total:</b>	<b>67W Max</b>

### Physical Characteristics

<b>Product Dimensions</b>	56(H) x 30(D) x 53(W) mm
<b>Weight</b>	110gms

### User Interface

Suitable for use with devices that support USB charging requiring up to 67W of power, including:

- Apple MacBook Air
- Apple MacBook Pro 13"
- Apple iPhone\*
- Apple iPad\* and iPad Air / Pro / Mini
