Accuratus Rechargeable Bluetooth 5.0 Wireless Bioplastic Wheatgrass Headphones/Headset

About

The Accuratus wireless wheatgrass headset is an all-in-one piece, with impeccable sound quality, a built in microphone, and dedicated buttons for your every headset need. The rechargeable lithium battery offers an impressive 15 hours of listening time once fully charged, or 13 hours of call time.

The ECO range is made of a bioplastic formed from polymers found in wheat, called lignin. The resultant bioplastic is workable, with similar properties to typical plastic - but without the use of any artificial chemicals or fossil fuels.
