## Description

The GVT-2013 MMF SC media converter is able to convert network signals between copper and fiber-optic based networks. The converter provides a 10/100/1000Base-T RJ-45 port, supports full duplex and half duplex switch connectivity and 10Base-T, 100Base-TX and 1000Base-T auto-sensing. Used in Multi-Mode Fiber with fibre-optic cabling, this can extend a network range up to 0.5km. The device features built-in Dip switches for easy converter configuration, which function on the Smart LFP (Link Fault Pass-through), allowing the converter to monitor both the fiber and copper ports for signal loss, as well as cut through and smart pass through mode.

The GVT-2013 is a Single-Port, End-Span IEEE 802.3at High Power over Ethernet converter designed specifically to satisfy the growing demand for higher power required network equipment such as PTZ (Pan, Tilt & Zoom) network cameras, PTZ speed dome, color touch-screen VoIP telephones, multi-channel (IEEE 802.11a / b / g / n / ac / ax) wireless LAN access points and other network devices that need higher power to function normally. The GVT-2013 is High Power over Ethernet converter series is an ideal solution to

delivering data and power to network devices directly via the RJ45 Port interface without the need for installing extra power outlets and electrical cabling.
