

FirestormLite® M.2 2280 SATA SSD

FirestormLite® M.2 SATA SSDs enhance performance and increase the speed of your machine. With ultra-fast boot times, quicker application load times and lower power consumption- FirestormLite technology instantly improves the reliability of your device.

Small but Powerful

An alternative to the larger form factor mSATA, M.2 SATA SSDs are designed to provide high performance storage for thin, power restrained devices. Ideal for small form factor applications such as ultra-thin mobile devices.

Boost your Battery Life

FirestormLite M.2 SATA SSDs extend the limited run-time of your device; creating a lower power state and reducing the amount of power used by your device. Go for longer between charges and get longer lasting performance from your device's battery.

Performance you can Rely On

Reduce upgrade costs and get trustworthy performance from your SSD. FirestormLite M.2 SATA SSDs do not degrade physically and have a longer lifespan than HDDs; providing your device with durable storage you can count on.

Need help finding the perfect match for your device?

FirestormLite SSDs can be matched to your machine as an OEM compatible solution, simply click the Hypertec Configurator link and search for your device by brand and model.

For more information about FirestormLite SSDs, or to find out how we can help you boost your machines performance, speak to your Hypertec Account Manager today.

Features:

- ✓ 3 Year Warranty includes Free Lifetime Technical Support
- ✓ Matched options available
- ✓ Suitable for both client SSDs as well as NAND- cache drives
- ✓ Noise and vibration free for completely silent computing
- ✓ Zero moving parts prevent mechanical malfunctions and extended product life
- ✓ S.M.A.R.T self-monitoring attributes improve reliability
