

# FUYL Tower™

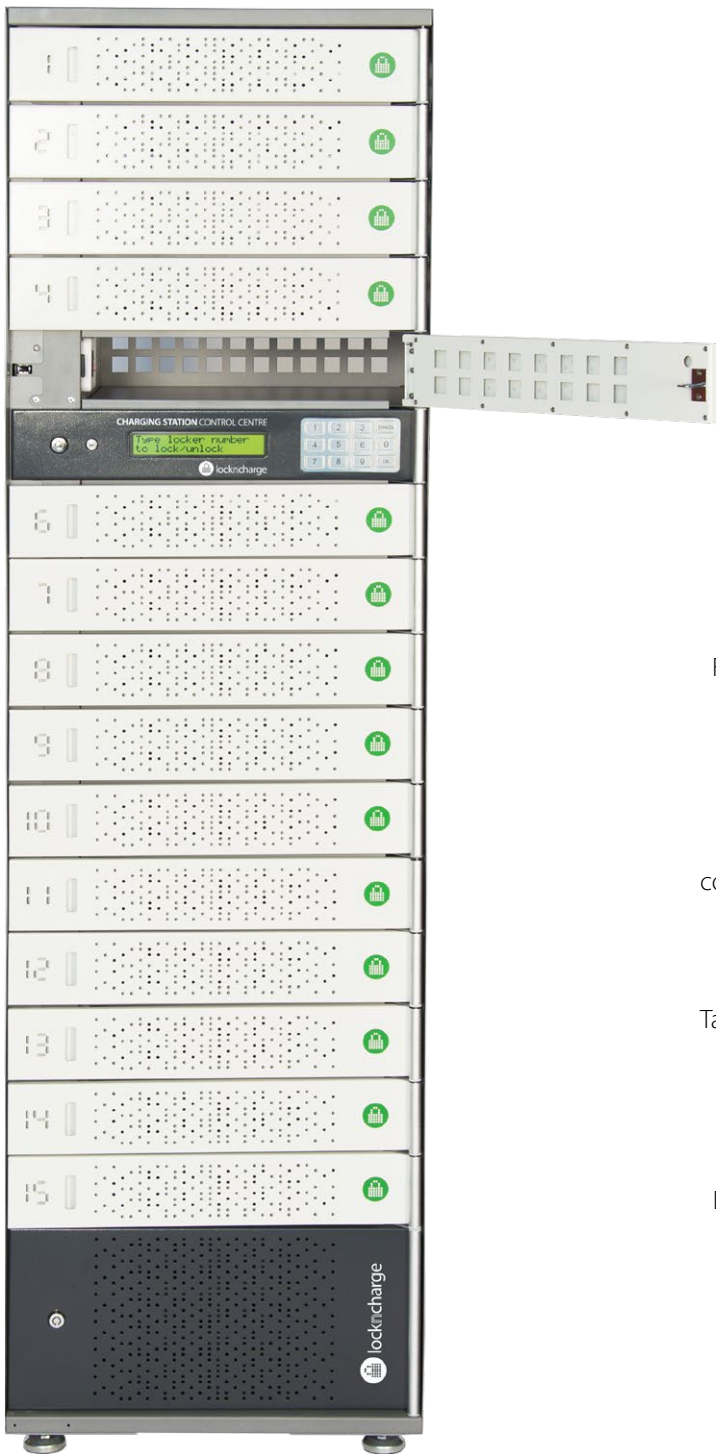

An intelligent charging station with 15 individually lockable compartments that can store and charge any mobile device.

-  **Efficient charging.** Each compartment is equipped with a power outlet and a 2.4 amp USB port, so you can charge almost any device, including; iPads, Tablets, Laptops, Chromebooks, mobile phones and more<sup>1</sup>.
-  **Intelligent remote management.** FUYL Tower features innovative software that enables administrators to actively monitor locker usage anytime, anywhere.
-  **Highly Secure.** The digital keypad controls the security of every compartment. Additionally, the management software records every time a compartment is opened or closed, enabling administrators to investigate abnormal usage.
-  **Fully ventilated.** Designed with passive ventilation to minimise heat build-up during charging.
-  **Lifetime warranty<sup>2</sup>.** LocknCharge products are built to last.

# It just makes life easier.

Taking device charging and security to a whole new level.

## More than just a powered locker.

Where the FUYL Tower shines is through the innovative management software that comes included with the tower itself. The FUYL Tower is Wi-Fi Ready and once network connected, designated administrators can view, access and manage one or more FUYL Towers remotely.

## Remote access.

Administrators can remotely open any door, deny access to a reserved locker, view the status of FUYL Towers on the network, receive alerts of any abnormal usage or technical fault and download a full audit log.

## Future proofed.

FUYL Tower software and firmware upgrades can be downloaded and installed for free via the FUYL Tower Management Portal.

## Secure digital locking system that's easy to operate.

Each individual locker is conveniently operated by the central control panel where you simply follow the prompts on the screen.

## API integration available.

Take your FUYL Tower to the next level by integrating with its API - allowing developers to integrate with your software and apps.

## Leverage in check-in and check-out environments.

Easily contain fully charged, ready to use devices inside the locker bay until an administrator provides access to a user. Admins can also assign a specific compartment to a single user.

## Specifications:

inches: 69.7(H) x 18.8(L) x 18.8(W)  
mm: 1771(H) x 477(L) x 477(W)  
weight: 78.1kg | 172.2lb
