

# Q-riser 110

The latest model

 BAKKER ELKHUIZEN

Work Smart - Feel Good

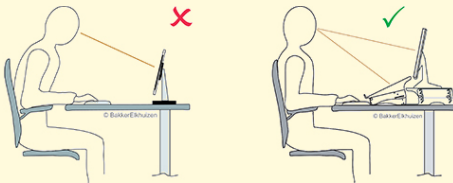

## Adjust your screen to the correct viewing height.

The Q-riser 110 and Q-riser 50 are the latest additions to the BakkerElkhuizen range of monitor stands.

Many people use large monitors these days, such as 24-inch models, the supports of which are considerably bigger and heavier.

We advise having a screen that can easily be adjusted and tilted so that every user can adjust its height.

**Practical:** adjustable to two heights (7.5 cm and 10.5 cm). It also has a larger surface area, making it suitable for modern widescreen displays.

**Ergonomic:** this stand enables you to obtain the correct working height easily.

**Cable management:** your monitor cord is neatly stowed.

**Design:** Dutch design & Made in Holland. A high-quality appearance.

**Material:** Clear acrylate, this eight-millimetre-thick acrylate provides a sturdy and stable base.

**Load capacity:** maximum 8,5 kg.

<b>Width</b>	370 mm (14.57 inches)
