

# Q-doc 100

Indispensable for permanent workstations

 BAKKER ELKHUIZEN

Work Smart - Feel Good

## Work in line and prevent neck complaints.

Place the Q-doc 100 document holder between your screen and keyboard. That prevents unnatural head and neck movements.

Because you work in a single line with the keyboard, document holder and screen, there is less strain on your body.

To prevent neck rotation, documents should be placed between the keyboard and display screen. A sloping work surface reduces flexion of the neck and thus increases work comfort. An 'in-line' document holder provides a functional work surface and short viewing distances between the document, screen and keyboard. The result is increased productivity.

**Ergonomic:** reduces neck and eye strain and prevents neck pain and headaches.

**Efficient:** short viewing distances between document, screen and keyboard.

**Suitable for:** books of all thicknesses and heavy files.

**Fixed:** A fixed and optimised viewing angle of 30 degrees.

**Clean-Desk:** a full-sized keyboard fits under the Q-doc 100.

**Material:** high-quality clear acrylate. Using acrylate creates a stable surface for heavy binders.
