

Filex Galaxy Modular Dual

Flexibly adjustable

The Filex Galaxy Modular Dual is suitable for two screens which can be adjusted separately.

A perfect screen setup is possible because of the individual arms. The viewing angle can be adjusted per screen.

The Filex Galaxy Modular Dual is an ideal monitor arm for your workspace layout. The monitor arm has a gas spring technology that makes it easy to quickly set the screen to any desired height. An optimal monitor position causes fewer neck problems (Kumar 1994 McKinnon 1994, Marcus 2002). Placing the monitor too low can make you bend your neck excessively and strain your neck muscles. An optimal screen height increases productivity by 10% (Sommerich et al., 1998).

The most modular monitor arm for a setup with 2 screens!

A correct positioning of your two screens allows you to work in a neutral position for both your neck and torso. The viewing distance will be optimised by the readability and light conditions which support you in performing your tasks in the work place. This monitor arm allows the positioning of the screens to be regulated simply and flexibly.

With the Filex Galaxy Modular Dual your desired configuration can be realized in seconds.

Advantages of the Filex Galaxy Modular Dual

Viewing angle

Adjust the height and depth of the screen seamlessly with the patented connector on the post. The three pivoting points on the static arm and the VESA head allow the screen to tilt, rotate and turn.

Clamp

Because of the wide range of clamps, it is possible to mount the Filex Galaxy monitor arm onto most desktops. The desk clamp and cable space feeder are included.

Rotation stop

The integrated rotation stop in the Filex Galaxy monitor arm ensures a desk can be placed against a wall or other desk (desk-to-desk) without the arms or wall touching.

Modular

The modular system provides you an easy work place expansion in the future. Simply expand to multiple screens, extend your post or include a electrification unit or CPU holder.

Circular

All parts are 100% recyclable and made from 100% sustainable materials. Because of the extensive range from 2 to 12 kg, you will not need a new gas spring when you use a different weight screen.

Design

Cable management is included in the Filex Galaxy series. This ensures a neat and tidy and professional look. All parts are available in White, Silver or Black and have a 5 year warranty.

Knowledge Center

An ergonomic workstation promotes the comfort and productivity of DSE workers. It is easy to create the ideal workstation with a few minor adjustments. Monitor arms provide more space for your workstation and improve your posture.

In addition, the height and distance of monitor arms can be adjusted easily. Moreover, more and more people are working...
